Constantly learning, constantly changing to improve yourself.

WORK EXPERIENCE

Hoang Khang Incotech

Internship Ruby on Rails

6/2020 - 5/2021

- The company provides materials from basic to advanced such as:

+ Agile Web Development With Rails 6.

+ Modular Rails The Complete Guide to Modular Rails Applications - Thibault Denizet.

- After a few months of studying and training, the company trusted and let me participate in a real project.

+ This is a web project about Lechef restaurant chain, website <https://lechef.vn/>

The functions are mainly about database query, user interface, logic processing.

- Technology mainly learned and worked on: Ruby on Rails, gems: Devise, CarrierWave, Sidekiq, CanCanCan, Kaminari...

Wao Studio

Full-stack Developer

6/2021 - 2/2023

- Participate in many Blockchain projects, NFT games,...

- Working on Agile Scrum environment.

- Manage projects on Github, do issues raised by testers, submit pull requests to code review team lead, then functionality is merged and live on staging, after tested again the functionality goes live in production.

- Learn more how to refactor code so it's easy to understand, read, and maintain.

- Reconfirm the features of issues with Japanese people, communicate completely in English

- Build and develop new functions as required, maintenance and debugging, UI design, database queries, RESTful API...

- Working as a full-stack developer: Ruby on Rails, Slim, JQuery, Reactjs, TypeScript, HTML, CSS, JS, PostgreSQL, SQL...
