- At the university level, I have been learning through java as well as having the most basic data structures and algorithms. While studying, I also taught robotics (algorithmic). After graduating, I went to work at Smartdev LLC company, with over a year and a half of experience in the web. Approaching through couple years working on i create a lot of special app with working beside a team, always try to get better day by day and become the member who teammate can push the trust with some complexity task. I also as well as the experience of some Databases and it has been verified through some projects I have done in the list skill.
- I consider myself to be diligent, friendly, enthusiastic and a hard worker. I can work under extreme pressure and also like to research new technology.
- I would like to work in a challenging environment to keep myself improving, learning more and using my learning skills in the best ways to help build the company and achieve its goals.
- I also like to play video games, swim and play football.
