Software and technology manager with over 6 years of experiences in software development project implementation, intensive knowledge on application development and relevant experience in Software Development Life Cycles (SDLC)

EXPERIENCE

DECEMBER 2021 – APRIL 2022
BLOCKCHAIN ENGINEER
SIGNED TRADE

Signed is a digital marketplace where musicians list their own crypto tokens backed by music royalties. The more people streaming a musician, the higher their token's value. Support and Invest in your favorite musician, while your pockets grow with them.

Supply and Demand is a big factor that determines the value of anything that can be traded, including all digital currencies in the market. For example, if more people are trying to buy a musician's token, while others are willing to sell them, the price will go up and vice versa. And since the supply of all tokens are limited, the increased popularity will drive up prices as a musician gains more social clout. Each tokens is also pumped out every times a musician's royalty pay, driving up the value of said token.

FEBRARY 2022 – APRIL 2022

FULL STACK DEVELOPEPR

DAPP AYAN

This Dap-ayan system formed part of the cultural practices by various towns in Ilocos Norte; however, as political structures became more formal, the use of Dap-ayan has been reduced. In the past, some people have been considering the Dap-ayan as chatting [pagtutungtungan] or drinking [paggi-inuman] place and other user were not noticed.
